This is the type of home you have to see in order to take in all that it has to offer. To begin, a split staircase leads you to the guest wing or master wing where each of 5 bedrooms has an en suite bathroom, and one has a separate entrance and kitchenette for maid's quarters or long-term guests. In the master wing, the master suite features a jetted tub, dual-sink vanity, walk-in closet, linen closet, separate lav with bidet, balcony with mountain views, and a second bedroom that could be used as an office or nursery.

The unique kitchen has double ovens, island with produce sink and breakfast bar, desk, wine fridge, grilling station and walk-in pantry with a built-in espresso machine. The main house also has 3 fireplaces, a sunken wet bar, formal dining room and office. The outdoor living area has a pool, kitchen with bar, bathroom, linen cabinet and a large patio with a pergola.

Additionally, there are on-grid solar panels, horse facilities and a 2-bedroom guest house with a garage.

1577 Kenewa Street

\$2,650,000
